

## **AMENDMENTS TO THE SPECIFICATION**

- **Please delete the present Abstract of the Disclosure.**

**Please add the following new Abstract of the Disclosure:**

The navigation apparatus is provided with a GPS reception section, a sensor section, a map data storage section in which data such as map data is recorded in advance, and a system control section which generates design data and performs process management on the basis of the generated design data. The system control section searches routes on the basis of spot data groups related to an extracted destination, generates route data on the basis of the search results, the spot data and an input departure time, and manages route guidance on the basis of the generated route data.
